

CDI

Revolutionizing the flexo printing industry with the most advanced digital flexo solutions.

1% homogeneous background grey printed with CMY. Very homogeneous printout despite CMY usage clearly shows the superiority of Perfect Highlight screening. No need to retouch to remove awkward tints like this from the job.

Smooth vignette transition to zero

Smooth and high contrast shadow without visible "edges"; High Detail Sharpness.

0,5% in CT prints with only 2% density. No need anymore to bump up CT. No loss of image contrast!

Pre-press is simpler and quicker - hence cheaper
